Activities

You will need to:

- 1 Match annotations 1 and 2 to an appropriate place on the photograph.
- 2 Complete annotations 3 and 4.
- 3 Write fully annotations 5 and 6.
- 4 Annotation 7 is for you to add anywhere on the photograph.

1 Tides can rush up creeks either side of a sandbank causing you to be stranded on a sandy island which then is drowned as the tide comes higher.

2 When there is a windy or stormy day at high tide, watch out for waves crashing over the sea wall.

3 Darker areas may be very fine wet _____ and there is a danger of getting _____ and or losing your _____. The _____ rises while you are stuck in the mud and you may _____.

4 If you walk through _____ water on the sand, watch out for deeper _____ or pools that you could fall into and get _____ away by the _____. Creeks have steep sandy sides that _____ easily because they are _____ by the rushing currents.

5 Creeks are deep. You cannot see out. Mention the tide in your answer?

6 The water's edge is a long way from shore. What happens if tide comes behind?
